

“Attendee feedback stated that the quality of the content and knowledge of the speakers was excellent!”

In January, our four-part 2021 Women in Energy & Environment Webinar Series reached an industry-leading, global audience of more than 450 professionals. You can access the benefits of this series via this placemat by accessing the recording and presentation materials of each session. Please feel free to contact the presenters via their hyperlinked bios should you have any questions. We look forward to seeing you attend future programs. We welcome your feedback. Please share your suggestions with [Christopher Timms](#) and help us continue to provide high-quality programs.

Embedding Environmental, Social and Corporate Governance Into the New Normal – Returning From the Pandemic

January 5

[Anita Lloyd](#) and our experienced industry-leading panelists discussed hot topics such as #BuildBackBetter (the UK COVID-19 recovery campaign) and the green recovery, investment into sustainable projects and the circular economy, corporate and governmental environmental policy, and Environmental, Social and Corporate Governance (ESG) accreditations such as B-corporation (B-Corp). A [recording of the webinar](#) is available.

Moderator

- [Anita Lloyd](#), Director, Squire Patton Boggs

Panelists

- Emma Arnold, Head of EHS and ESG Advisory, Arcadis
- Roz Bulleid, Head of Policy, Green Alliance
- Rozanne Davis, Head of Sustainability & Nutrition, Innocent Drinks
- Sarah Handley, Head of Sustainability and Environmental Governance, Siemens Energy
- Nina Driver, Practice Development Lawyer, Squire Patton Boggs

Key Regulatory Issues in the UK in Environment and Sustainability: 2021 and Beyond

January 12

[Nicola Smith](#) and our experienced industry-leading panelists discussed key UK environmental and sustainability issues ahead, such as chemical regulation post-Brexit, single-use plastics, net-zero carbon, circular economy and producer responsibility in the UK. A [recording of the webinar](#) and [presentation materials](#) are available.

Moderator

- [Nicola Smith](#), Director, Squire Patton Boggs

Panelists

- Susanne Baker, Associate Director, Climate, Environment & Sustainability, techUK
- Susan Branch, CEO, Starbons Ltd
- Sarah Foster, Commercial Director, Comply Direct
- Sandy Luk, CEO, Marine Conservation Society
- [Caroline Almond](#), Senior Associate, Squire Patton Boggs

Looking Ahead to 2021: Implications of a Change in Administration on Environmental Policy in the US

January 19

[Karen Winters](#), [Kendra Sherman](#), [Patricia Doersch](#) and Jessica Francisco, Head of Sustainability – North America, Arcadis, evaluated the implications of a change in Administration on environmental policy in the US. The environmental policy agenda advanced by the Biden Administration is a marked contrast to that of the Trump Administration. The Biden environmental policy agenda includes a Plan for a Clean Energy Revolution to address climate change at the federal level and reengage with the global community to effect reductions in greenhouse gases, infrastructure development that includes a move to cleaner energy, a greater focus on sustainability and environmental justice and likely more significant enforcement. A [recording of the webinar](#) and [presentation materials](#) are available.

Key Regulatory Issues in the US in Energy and Environment: 2021 and Beyond

January 26

[Carolyn McIntosh](#), [Emily Huggins Jones](#) and [Lianne Mantione](#) continued to evaluate the implications of a change in Administration on environmental policy in the US. Climate change, including rejoining the Paris Climate Accord and implementing a broader range of renewable energy initiatives, is one of the highest environmental priorities for the Biden Administration. Reducing chemical exposures that may cause human health or environmental risks in “frontline” communities will also be an early focus of the incoming Administration. The discussion included the rejoining of the Paris Accord, off-shore wind, likely air quality, chemicals, water protection, and related actions that will be “on deck” for review, and what Trump Administration “midnight regulations” and deregulatory actions are likely to be addressed by the Biden Administration in its first 100 days. A [recording](#) of the webinar and [presentation materials](#) are available.

Follow our [frESH blog](#) and get a truly global perspective on significant environmental, safety and health developments. You can subscribe to receive new posts directly to your Inbox.

Our [frESH Law Training program](#) provides a comprehensive suite of UK-based training courses that focus on practice and procedure for health and safety law, environment, anti-bribery and corruption, food and drink laws and product safety.
